

QObject

QGraphicsPixmapItem

boat

```
classDiagram
    QObject <|-- boat
    QGraphicsPixmapItem <|-- boat
```

The diagram illustrates a class hierarchy where the 'boat' class inherits from both 'QObject' and 'QGraphicsPixmapItem'. A horizontal line connects the two parent classes, and a vertical line descends from its center to the 'boat' class box. Two arrows point upwards from the 'boat' box to the 'QObject' and 'QGraphicsPixmapItem' boxes, indicating the inheritance relationship.
